

Olívér Rudolf Jakab

PHP / Laravel Developer — Full-stack Web

Offenbach am Main, Germany | +36 20 582 1847

Oliver.Jakab.R@gmail.com | github.com/JakabOliver | linkedin.com/in/oliver-jakab

PROFILE

Full-stack PHP / Laravel developer with around ten years of experience building and shipping production web platforms — from large-scale comparison and SaaS products to systems I have designed and built single-handedly. Currently a Professional Full-stack Developer at Check24, alongside an ongoing freelance portfolio. Comfortable owning features end to end — from backend logic and APIs through to frontends, third-party integrations, and payment systems.

SKILLS

Backend: PHP, Laravel, Zend Framework, MySQL, REST APIs, OAuth & authentication/authorization, PHPUnit & testing

Frontend: JavaScript, Vue, React, jQuery, HTML5, CSS3, SASS, Tailwind, Twig, AJAX

DevOps & Tools: Docker, Git & GitFlow, Linux (server administration), CI/CD (Jenkins), Vite, Webpack, Composer

Integrations: Payment gateways (Braintree, SimplePay, Számlázz.hu), SOAP & XML web services, FTP/SFTP transporters, PDF generation, email & newsletter systems

PROFESSIONAL EXPERIENCE

Professional PHP Full-stack Developer

01/2024 – 09/2026

Check24 — Germany · Wohngebäudeversicherung (residential-building insurance) team, 12 people

- Build full-stack features for the building-insurance product on one of Germany's largest comparison platforms — backend logic, frontends, and partner-facing APIs.
- Develop and maintain partner integrations and API connections with insurance providers.
- Building out an MCP (Model Context Protocol) server to power the company's own AI chatbot.

PHP Full-stack Developer (Working Student → Medior)

05/2018 – 12/2023

PublishDrive — Budapest, Hungary · SaaS book-distribution aggregator · team of 4–5

- Joined as a working student and grew into a Medior full-stack engineer over five years.
- Rebuilt the entire user onboarding process from the ground up.
- Built and rebuilt frontends and full modules; developed finance features including subscriptions and royalty/revenue distribution.
- Developed and maintained store (partner) integrations — data transmission and connection handling — delivering book files and metadata to major retailers (Apple Books, Kobo, Google Play Books, Barnes & Noble, and others).

FREELANCE & INDEPENDENT PROJECTS

Freelance Full-stack Developer

2016 – present

Independent / contract — multiple clients (Hungary & remote)

- **VersusX (versusx.io), 2025 – present** — In a two-person team: built the marketing landing page and currently rebuilding the backend and APIs in Laravel.
- **Korfball.online, 2019 – present** — Sole developer of the online database for the Hungarian Korfball Federation. A complex backend and data system managing players, seasons and registrations, match-report forms, scoring, and top-scorer rankings. Stack: PHP, Laravel, MySQL, Vue.

- **Kacsakő (kacsako.hu)** — Built both of the company's sites from scratch: a Webflow landing page and an events calendar (naptar.kacsako.hu) in Laravel and Vue.
- **Mozdulj Szentendre (mozdulj.szentendre.hu), 2026** — Activity-promotion and registration platform for the city of Szentendre, letting residents discover and sign up for activities. Stack: PHP, Laravel, Vue.
- **Elsősegelyonline.hu, 2016 – Present** — Solo-built e-learning platform: authentication (email/password, later OAuth), payment integration (Számlázz.hu, SimplePay), PDF certificate generation, a content/media library, and discount-coupon & access-token systems. Stack: PHP, MySQL, Twig, jQuery.
- **Elsőláncszem first-aid sites (elsősegely.hu, elsolancszem.hu, kozutielsősegely.hu & more), 2017 – present** — A template-driven generator producing unlimited landing pages across multiple training domains, a national first-aid competition platform (iskolaiversenyek.hu), a classroom-training registration system, and a bulk newsletter platform. Stack: PHP, Laravel, MySQL, jQuery/AJAX.

EDUCATION

BSc in Computer Engineering

2025

Budapest University of Technology and Economics (BME-VIK)
